DETAILED ACTION

Response to Amendment

1. The amendment filed 8/23/05 has been received and made of record. In the response section of the amendment, Applicant's attorney references the interview held August 15, 2005, and states that the examiner agreed to allow claim 61 since the cited art, namely the Martin et al. reference, did not teach electret polymers. However, upon further review of the final office action, the Martin et al. reference, the definition of electret and other references pertaining to electret polymers, the examiner has determined that the materials used in Martin et al. are electret polymers, particularly, polytetrafluoroethylene¹. Thus, the rejection of claim 61 is maintained.
2. Applicant should, however, note that the finality of the last Office action is withdrawn and that the present Office action made final.

Information Disclosure Statement

3. The information disclosure statement filed 3/2/06 fails to comply with 37 CFR 1.97. It has been placed in the application file, but the information referred to therein has not been considered.

¹ Note Appendix A.

Election/Restrictions

4. This application contains claims 42-46, 50-58, 60, 62-64 and 81-103 drawn to an invention nonelected with traverse in Paper No. 5. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 61 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 4,043,331 (“Martin et al.”).

As regards claim 61, Martin et al. disclose a method of forming at least partially solid material by subjecting a liquid at an outlet (col. 6, line 56) to an electric field causing the liquid to form at least one jet of electrically charged liquid, the liquid being such that after formation, the jet forms a fiber (col. 1, lines 13-23).

As to applicant’s recitation, “to provide nuclei or otherwise initiate interactive cellular and/or molecular events in tissue repair”, the applicant is directed to col. 2, lines 12-17, which recites “[w]here the dressing is formed from a wettable polymer, blood or serum escaping from the wound tends to penetrate the dressing and the high surface area encourages clotting. Such dressing may be used as emergency dressings to halt

bleeding.” This disclosure clearly meets the limitation of initiating interactive molecular events in tissue repair.

Allowable Subject Matter

7. Claims 47-59, 65-67, 69-75, and 77-80 are allowed.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
